## About Guardians of Elderon

Guardians of Elderon is a free-to-play combat-focused base builder game.

Here you get to create your very own fantasy base, summon powerful guardians, go on unique quests and attack the base of other players to become the greatest summoner in Elderon !

## The word of the game's creator

Typical real-time, action-focused multiplayer games open the door to a world of harassment and toxicity – behavior that can ruin a game and make players regret participating. On the other hand, the usual asynchronous multiplayer game lacks action and excitement.

Through its unique asynchronous gameplay elements, Guardians of Elderon delivers an action-packed multiplayer experience with the peace of mind and convenience of a single-player game. Casual players can gravitate toward quests through PvE, while more ambitious players can focus on attacks through competitive PvP.

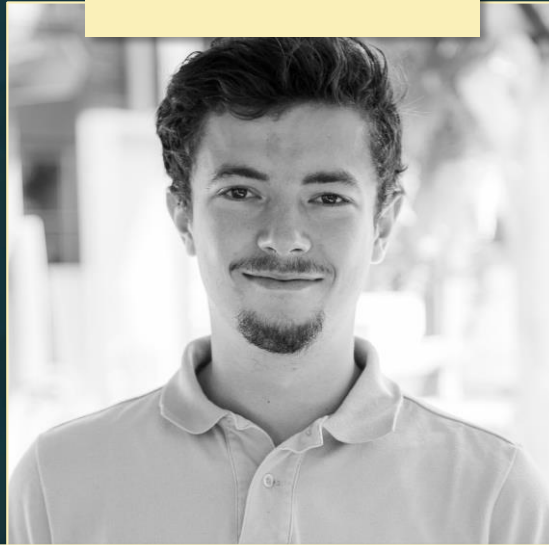

*“I wanted to provide action and stealth elements you can find in MOBAs, but without direct interaction with players; for example, in team-based games you can get harassed if you make a mistake, or if the others think you're not doing something right.”*

*Tiberiu Stefan*
